

Risk Analysis Science Committee Charter [Approved December 2018]

I. Purpose: The Risk Analysis Science Committee will provide guidance, direction, and assistance to the Society on scientific issues. It has a special responsibility for following up the Strategic plan goals and prioritizations on issues related to risk science.

II. Composition: The SRA President will appoint the Chairperson of the Risk Analysis Science Committee. The Committee is composed of members in good standing with strong risk science competence covering the many faces of risk, appointed by the chair after consultation with the SRA President and President elect. For continuity, the Committee typically includes at least two members who served on the prior year's Committee.

III. Duties: The Committee shall have the following duties:

- Foster and conduct activities that can contribute to meeting the Strategic plan goals and prioritizations related to risk science. Examples of such activities are:
 - o development of guidance documents and other types of material for high quality risk analysis
 - o promotion of research and development on specific topics
 - o collaboration with other organizations to promote risk science
 - o develop and monitor relations with governmental science and funding agencies
- Provide input to the strategic planning related to risk science issues
- Provide advice to the Executive Committee and Council on scientific issues

The committee will meet in person during the Annual Meeting, and at least one other time each year via teleconference.
